Weekly Coal Production

Production for Week Ended:
July 16, 1988

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. This week's Supplement 1 includes monthly and annual U.S. level data on coal production, consumption, and stocks. Supplement 2 contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price); and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1986*, and *Coal Data: A Reference*.

This publication was prepared by John Moens under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/586-8800).*

released for printing July 22, 1988

Summary

U.S. coal production in the week ended July 16, 1988, as estimated by the Energy Information Administration, totaled 17.9 million short tons, 39 percent higher than production in the previous week. Most of the 5.1 million short ton increase in production occurred east of the Mississippi, where production was 4.5 million short tons higher than the previous week, as many of the UMWA miners returned from their annual 2 week vacation period. Production in every State west of the

Mississippi was higher than the previous week with the exception of Colorado, New Mexico, Oklahoma and Utah.

This week's coal production was 1.5 million short tons or 9.5 percent higher than in the corresponding week of 1987, with West Virginia and Wyoming accounting for nearly half the increase.
